2. Hazards Identification

Emergency Overview: We do recommend handling all chemicals with caution. Use proper protective equipment when handling chemicals. To our knowledge, the hazards of this material have not been thoroughly investigated.

GHS Hazard Classification: N/A
GHS Physical Hazards: N/A
CHS Haglib and Environmental Ha

GHS Health and Environmental Hazards

N/A

GHS Signal Words: N/A

GHS Hazard Statements: N/A

GHS Precautionary Statements: N/A

Potential Health Effects for:

Inhalation: If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give

oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control

measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification

Health hazard: 0

Chronic Health Hazard: 0

Flammability: 0
Physical hazards: 0

NFPA Rating

Health hazard: 0

Fire: 0

Reactivity Hazard: 0

3. Composition

Ingredients/Components:

Chemical Name: DABCYL PlusTM C2 maleimide

Molecular formula: No N/A

Molecular weight: 570.6 CAS-No N/A

EC-No N/A

4. First Aid Measures

| Inhalation: | If dust is inhaled, remove from contaminated area. |
|-------------|--------------------------------------------------------------------------------------------------------------------------------------------------|
| | Encourage patient to blow nose to ensure clear passage of breathing. |
| | If irritation or discomfort persists seek medical attention. |
| Ingestion: | If swallowed do NOT induce vomiting. |
| | If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration. |
| | Observe the patient carefully. |
| | Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably |
| | drink. |
| | Seek medical advice. |
| Skin: | If skin or hair contact occurs: |
| | Flush skin and hair with running water (and soap if available). |
| | Seek medical attention in event of irritation. |
| Eyes: | If this product comes in contact with the eyes: |
| | Wash out immediately with fresh running water. |
| | Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the |
| | eyelids by occasionally lifting the upper and lower lids. |
| | If pain persists or recurs seek medical attention. |
| | |

| Extinguishing media: | | Water spray or fog. |
|--------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | | Alcohol resistant foam. |
| | | Dry chemical powder. |
| | | BCF (where regulations permit). |
| | | Carbon dioxide |
| | | Curoni dionide |
| Special firefighting procedures: | | Alert Emergency Responders and tell them location and nature of hazard. |
| | | Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water |
| | | course. Use water delivered as a fine spray to control fire and cool adjacent |
| | | area. |
| | | DO NOT approach containers suspected to be hot. |
| | | Cool fire exposed containers with water spray from a protected |
| | | location. |
| | | If safe to do so, remove containers from path of fire. |
| | | Equipment should be thoroughly decontaminated after use. |
| Unusual fire and explosions hazards: | | Emits toxic fumes under fire conditions |
| J I | - | |

| Engineering controls | Local exhaust ventilation is required where solids are handled as powders or crystals; even when particulates are relatively large, a certain proportion will be powdered by mutual friction. Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace. If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of: (a): particle dust respirators, if necessary, combined with an absorption cartridge; (b): filter respirators with absorption cartridge or canister of the right type; (c): fresh-air hoods or masks Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding. Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting. Air contaminants generated in the workplace possess varying "escape" velocities which, in turn, determine the "capture velocities" of fresh circulating air required to efficiently | | |

Reproductive Toxicity:

No information available

12. Ecological Information

No information available.

13. Disposal Considerations

All waste must be handled in accordance with local, state and federal regulations. Legislation addressing waste disposal requirements may differ by country, state and/ or territory. Each user must refer to laws operating in their area. In some areas, certain wastes must be tracked.

14. Transport Information

| Hazard Class | N/A |
