GHS Hazard Classification:GHS Physical Hazards:Not a dangerous substance according to the GHSGHS Health and Environmental Hazards:Not a dangerous substance according to the GHS

GHS Signal Words: None

GHS Hazard Statements: None

GHS Precautionary Statements: None

Potential Health Effects for:

*Inhalation:* If inhaled, remove to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen. Good hygiene practice requires that exposure be kept to a minimum and that suitable control measures be used in an occupational setting.

Ingestion: If swallowed, wash out mouth with water provided person is conscious. Call a physician.

Skin: In case of contact, immediately wash skin with soap and copious amount of water.

Eyes: In case of contact, immediately flush eyes with copious amounts of water for at least 15 minutes.

Chronic Exposures: No information available. We recommend limiting prolonged exposure.

Target Organs: No information available

HMIS Classification

Health hazard: 0 Chronic Health Hazard: 0 Flammability: 0 Physical hazards: 0

NFPA Rating

Health hazard: 0 Fire: 0 Reactivity Hazard: 0

3.	Com	position

Ingredients/Components:

Chemical Name:

#### [Arg(Me2a)3] - Histone H4 (1 - 23) - GGK(Biotin) H - SGR(Asym Me2) GKG GKG LGK GGA KRH RKV LRG GK(Biotin) -OH

Molecular formula: NA Molecular weight: 2857.6 CAS-No NA EC-No NA

Inhalation:	If dust is inhaled, remove from contaminated area.
	Encourage patient to blow nose to ensure clear passage of breathing.
	If irritation or discomfort persists seek medical attention.
Ingestion:	If swallowed do <b>NOT</b> induce vomiting.
	If vomiting occurs, lean patient forward or place on left side (head-down position, if possible) to maintain open airway and prevent aspiration.
	Observe the patient carefully.
	Give water to rinse out mouth, then provide liquid slowly and as much as casualty can comfortably
	drink.
	Seek medical advice.
Skin:	If skin or hair contact occurs:
	Flush skin and hair with running water (and soap if available).
	Seek medical attention in event of irritation.
Eyes:	If this product comes in contact with the eyes:
	Wash out immediately with fresh running water.
	Ensure complete irrigation of the eye by keeping eyelids apart and away from eye and moving the
	eyelids by occasionally lifting the upper and lower lids.
	If pain persists or recurs seek medical attention.

1

Alcohol resistant foam. Dry chemical powder. BCF (where regulations permit). Carbon dioxide       Special firefighting procedures:       Alert Emergency Responders and tell them location and nature of hazard. Wear breathing apparatus plus protective gloves. Prevent, by any means available, spillage from entering drains or water course. Use water delivered as a fine spray to control fire and cool adjacent area. DO NOT approach containers suspected to be hot. Cool fire exposed containers with water spray from a protected location If safe to do so, remove containers from path of fire. Equipment should be thoroughly decontaminated after use.       Unusual fire and explosions hazards:     Emits toxic fumes under fire conditions       Spill response     Remove all ignition sources. Clean up all spills immediately. Avoid contact with skin and eyes. Control personal contact by using protective equipment. Use dry clean up procedures and avoid generating dust. Place in a suitable, labeled container for waste disposal	Extinguishing media:		Water spray or fog.
Dry chemical powder.     BCF (where regulations permit).       Carbon dioxide     Alert Emergency Responders and tell them location and nature of hazard.       Wear breathing apparatus plus protective gloves.     Prevent, by any means available, spillage from entering drains or water course.       Use water delivered as a fine spray to control fire and cool adjacent area.     DO NOT approach containers suspected to be hot.       Cool fire exposed containers with water spray from a protected locatior If safe to do so, remove containers from path of fire.     Equipment should be thoroughly decontaminated after use. Place in a suitable, labeled container for waste disposal       Containment     Avoid all personal contact, including inhalation.       Wear protective clothing when risk of exposure occurs.     Use in a well-ventilated area.       DO NOT enter confined spaces until atmosphere has been checked.     DO NOT allow material to contact humans, exposed food or food utensils.       Avoid contact with incompatible materials.     When handling, DO NOT eat, drink or smoke.       Keep containers securely sealed when not in use.     Avoid physical damage to containers.       Always wash hands with soap and water after handling.     Use good occupational work practice.       Empty containers may contain residual dust which has the potential to accumulate following settling. Such dusts may explode in the presence of an appropriate ignitio source.       Do NOT cut, drill, grind or weld such containers       PPE     Use personal protective equipment		Control pe	ersonal contact by using protective equipment.

		breeded and protect	ted from light. Store away from oxidizing agent.

Г

Store at -20 °C, dry desiccated and protected from light. Store away from oxidizing agent.

Engineering controls	Local exhaust ventilation is required where solids are handled as powders or crystals;
0	even when particulates are relatively large, a certain proportion will be powdered by mutual friction.
	Exhaust ventilation should be designed to prevent accumulation and re-circulation of particulates in the workplace.
	If in spite of local exhaust an adverse concentration of the substance in air could occur, respiratory protection should be considered. Such protection might consist of: (a): particle dust respirators, if necessary, combined with an absorption cartridge;
	(b): filter respirators with absorption cartridge or canister of the right type; (c): fresh-air hoods or masks
	Build-up of electrostatic charge on the dust particle, may be prevented by bonding and grounding.
	Powder handling equipment such as dust collectors, dryers and mills may require additional protection measures such as explosion venting.
	Air contaminants generated in the workplace possess varying "escape" velocities which,
	in turn, determine the "capture velocities" of fresh circulating air required to efficiently
PPE	remove the contaminant. Use personal protective equipment

## 9. Physical and Chemical Properties

Γ

Physical State	Solid
Odour	Not available
Solubility in Water	Not available
Specific Gravity	Not available
рН	Not available
Boiling Point	Not available
Melting Point	Not available
Flash Point	N/A
Vapor Pressure:	N/A
Vapor Density:	N/A

## 10. Stability and Reactivity

No data available
No data available
COx, NOx when burned

Keep container tightly closed in a dry well-ventilated place. Store in -20 °C, dry refrigerator.

### 11. Toxicological Information

RTECS Number	N/A
Toxicity	No information available.
Health Hazards	Although ingestion is not thought to produce harmful
	effects, the material may still be damaging to the
	health of the individual following ingestion, especially
	where pre-existing organ (e.g. liver, kidney)
	damage is evident. In an occupational setting however,
	ingestion of insignificant quantities is not thought to be
	cause for concern.
Potential Hazards	Not available
